

EMERGENCY LIGHTING

EMERGENCY LIGHTING SAVES LIVES

Securing your facility with the proper emergency lighting equipment can be crucial to avoiding injuries and saving lives in the event of an emergency or power outage. Provide safe evacuation routes for patrons and workers by installing and maintaining emergency lights and exit signs throughout designated stairways, ramps, aisles, walkways, and escalators leading to a public way.

The Steiner Lighting Application Team can assist you in selecting the right emergency lighting equipment to maximize the safety of your facility and meet current building code requirements to maintain compliance with local laws.
